in personal spaces

personal air purification...

The Fresh Air Buddy is a light-weight solution for healthier breathing! Whether you're at work, traveling, or out on the town, you can feel confident that the stylish Fresh Air Buddy is effective wherever you are indoors!

How It Works – 13 Studies Prove It!

The Fresh Air Buddy creates an almost particle-free "exclusion zone" around the wearer by generating high intensity ion streams that add charges to nearby airborne particles. These charged particles repel each other and adhere to surfaces out of your breathing zone. This means substantially decreased concentrations of toxic allergens, smoke, dust, viruses, and bacteria in the air you breathe and the air that contacts your eyes.*

Everybody Needs A Buddy!

Fresh Air Buddy technology requires no fans, no filters, no maintenance, and is lightweight and easy-to-use. The Buddy comes with a universal neck strap, a built-in clip for hanging it on a collar, and rechargeable batteries are included. Best of all, it works! That's why everybody needs a Buddy!

The Fresh Air Buddy line of Air Purifiers are not medical devices. This product is not intended to to diagnose, treat, cure, or prevent any disease.

Fresh Air Buddy is most effective in indoor environments when the wearer is standing or sitting upright. Outdoor conditions or other positions, such as lying down, will reduce or eliminate the benefits of wearing a Fresh Air Buddy.

* With most viruses and bacteria measuring between 0.04 and 3 microns in size, the technology in the Fresh Air Buddy has been confirmed by world authorities in health-related aerosol studies to significantly reduce particles of this size range. This significantly decreases the probability that these particles will be inhaled, giving you cleaner, fresher air to breathe, and a reduced risk of adverse health effects.

Your Personal Air Purifier

It's like a shield protecting the air around you; a barrier that most indoor air contaminants can't penetrate. With the Fresh Air Buddy, you can enhance your comfort while making a statement! You'll feel confident that no matter where you are, indoor airborne pollen, mildew, germs, and other allergens will be significantly reduced in the air you breathe.

Fresh Air Buddy Charger Combo Pack includes:

Fresh Air Buddy, Universal Fast Charger and
2 Lithium LFP 123A Batteries
